-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1 and 2, drawn to a Method for performing tapping process in a punch press.

Group II, claims 3-10, drawn to a Tapping device with a tap holder in a punch press.

Group III, claims 11 and 12, drawn to a Punch Press with a rotating mold indexing device for performing rotation indexing of a rotating mold.

Group IV, claims 13-15, drawn to a Tapping device having a tap die for supporting a work piece.

2. The inventions listed as Groups I,II,III, and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Inventions I and II – the common features are a tap, a rotating mold indexing device and a punch press. These features are not considered “special” with respect to the Tapping and/or Punch art, and therefore the inventions do not share the same or corresponding “special technical feature”.

Inventions I and III – the common features are a rotating mold indexing device, a tapping tool and a punch press. These features are not considered “special” with respect to the Tapping and/or Punch art, and therefore the inventions do not share the same or corresponding “special technical feature”.

Inventions I and IV – the common features are a tap and a work piece with a prepared hole. These feature are not considered “special” with respect to the Tapping art, and therefore the inventions do not share the same or corresponding “special technical feature”.

Inventions II and III – the common features are a rotating mold indexing device and a punch press. These features are not considered “special” with respect to the Tapping and/or Punch art, and therefore the inventions do not share the same or corresponding “special technical feature”.

Inventions II and IV – the common feature is a tap. This feature is not considered “special” with respect to the Tapping art, and therefore the inventions do not share the same or corresponding “special technical feature”.

Inventions III and IV – there are no common features, and therefore the inventions do not share the same or corresponding “special technical feature”.

3. A telephone call was made to Mr. William Pieprz on Thursday, 6, September 2007 to request an oral election to the above restriction requirement, but did not result in an election being made. Mr. William Pieprz requested the written Election/Restriction be sent out.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the

Art Unit: 3722

inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103 (a) of the other invention.

There is an examination and/or search burden for these patentably distinct inventions due to their mutually exclusive characteristics. The inventions require a different field of search (e.g. searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one invention would not likely be applicable to another invention; and/or the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

#### ***Conclusion***

6. Any inquiry concerning the content of this communication from the examiner should be directed to Michael W. Talbot, whose telephone number is 571-272-4481. The examiner's office hours are typically 8:30am until 5:00pm, Monday through Friday. The examiner's supervisor, Mrs. Monica S. Carter, may be reached at 571-272-4475.

In order to reduce pendency and avoid potential delays, group 3720 is encouraging FAXing of responses to Office Actions directly into the Group at FAX number 571-273-8300. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers, which require a fee, by applicants who authorize charges to a USPTO deposit account.
